

Conjecturing

Saying what you think, what you notice or why you think something happens.

Convincing

Persuading people that your thoughts or conjectures are true.

Organizing

Putting things, such as numbers, facts or shapes into groups, an order or a pattern.

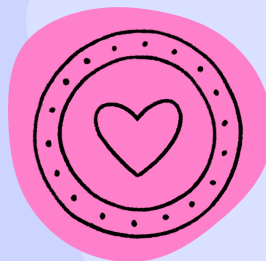

Classifying

Explaining what is similar about things you have grouped together.

Imagining

Imagining objects, patterns, numbers and resources to help you solve problems.

Expressing

Showing and explaining your thinking or reasoning about a problem, relationship or connection you've made.

Specializing

Looking at specific examples of something to test if thoughts and conjectures are true.

Generalizing

Spotting and rules, patterns and relationships in math.
